

ILLINOIS BIRDDOG RESCUE

DOG WALKER/ ENGLISH SLIP LEAD

The Mendota Big Dog Walker is the ideal way to humanely take your pet for an outing. For years, Illinois Birddog Rescue has been providing the 6 foot leash with every adoption. Now we have them available in 10 foot lengths for even easier walking or running with your pet. In the modified half hitch position, your dog will not strain with anything around their neck. As a rescue and leader in dog training, we feel the Dog Walker is a kinder method of walking your dog rather than the cruel pinch or choker collar methods. Also because it is not attached to the collar, there is no danger of the collar slipping over your dog's head.

Leash Instructions

Put the martingale thicker collar portion over the dog's head. Place the leash either direction under the dog's chest and behind the arms and bring back up through the hole between the metal ring and knot. The knot is there to prevent the leash from slipping back to the

dog's girth. The dog should feel pressure under the chest- not on the neck. This technique will prevent any leash/collar accidents since it is separate from the collar.

Currently we are offering the leashes in 6 foot lengths for \$20 and the 10 foot lengths for \$25. Shipping would be an additional \$7 for Priority Mail and handling.

Available colors are the following.
