TICK PANEL		EHRlichia CANIS AB IFA		
Test	Result	Reference Range	Flag	Bar Graph
EHRlichia CANIS AB	NEGATIVE			
<p>Comments:</p> <p>Interpretation:</p> <p>If your result is: The interpretation is:</p> <p> NEGATIVE No antibody present @ 1:25</p> <p> POSITIVE @ (titer) Antibody present @ (titer)</p> <p>Positive samples are tested in incremental dilutions to 1:3200. Titers beyond 1:3200 are usually of limited clinical value. If you wish an endpoint titer there is an additional charge. A positive titer indicates exposure to E.canis or similar antigen but does not confirm the presence of disease. A CBC is recommended to identify abnormalities consistent with infection. If confirmation of infection is desired, Ehrlichia PCR test, code 2634 can be useful, especially in clinically sick animals.</p>				

TICK PANEL		LYME (BORRELIOSIS) TITER		
Test	Result	Reference Range	Flag	Bar Graph
LYME (BORRELIOSIS) TITER	POSITIVE @ 1:200			
<p>Comments:</p> <p>Interpretation:</p> <p>If your result is: The interpretation is:</p> <p> NEGATIVE No antibody present @ 1:100</p> <p> POSITIVE @ (titer) Antibody present @ (titer)</p> <p>Positive samples are tested in incremental dilutions to 1:12,800. A</p>
